PLATEAU GROUND FEEDER

Encourage all kinds of small wildlife to flourish on your land with this durable, low maintenance feeder. Built to withstand the elements and exclude larger species so small, more vulnerable wildlife have a consistent source of supplemental food.

The Plateau Ground Feeder helps to attract, retain, and improve the bird and small wildlife population on your land with its smart design, combining high quality with low maintenance. Available in two sizes, the feeding areas are enclosed with customized heavy-gauge panels and deter non-target species, such as hogs and deer from consuming the food and while also providing protection for smaller wildlife.

Ground Feeder 100
\$375* or \$525 installed**

Ground Feeder 200
\$495* or \$695 installed**

*Plus tax **Plus tax and mileage

Installation includes set up in proper location on your property and filled with 100 lbs of seed mix for the Ground Feeder 100 and 200 lbs of seed mix for the Ground Feeder 200. Photos, GPS way points and written documentation of your installation available upon request.

FEATURES:

- ◆ All welded metal construction with a high quality matte finish for years of durable service.
- ◆ The capacities of these systems allow them to go for longer periods without being refilled, making it more efficient than smaller feeders in this same category.
- ◆ Easy maintenance with a flip top lid and simple, reliable feed distribution
- ◆ Feeding area is protected from rain and sun by the feed hopper above. Provides a great feeding and loafing area for small wildlife while extending the life of the seed
